2018 17:22:00 GMT Deep learning - Wikipedia - A recurrent neural network (RNN) is a class of artificial neural network where connections between nodes form a directed graph along a sequence. This allows it to exhibit temporal dynamic behavior for a time sequence. Unlike feedforward neural networks, RNNs can use their internal state (memory) to process sequences of inputs. This makes them applicable to tasks such as unsegmented, connected ... Thu, 06 Dec 2018 00:31:00 GMT Recurrent neural network - Wikipedia - Feature-wise transformations in the literature. Feature-wise transformations find their way into methods applied to many problem settings, but because of their simplicity, their effectiveness is seldom highlighted in lieu of other novel research contributions.
