GMT vertebrate life 9th edition pdf - A fetus or foetus (/ ˈ ɛ ː f i ɪ • t ɛ ɪ ˈ s /; plural fetuses, feti or foetuses) is the unborn offspring of an animal that develops from an embryo. Following embryonic development the fetal stage of development takes place. In human prenatal development, fetal development begins from the ninth week after fertilisation (or eleventh week gestational age) and continues until birth. Fetus - Wikipedia - Animal rights is the idea in which some, or all, non-human animals are entitled to the possession of their own lives and that their most basic interests—such as the need to avoid suffering—should be afforded the same consideration as similar interests of human beings.. Its advocates oppose the assignment of moral value and fundamental protections on the basis of species membership alone ... Animal rights - Wikipedia -
